SUMMARY

Full-Stack Software Engineer with 4.5+ years of professional experience, and a strong backend foundation in **Node.js/NestJS** microservices, real-time infrastructure, and API design, complemented by hands-on frontend experience in **ReactJS**. Proven track record building scalable, production-grade systems across iGaming, fintech, and enterprise SaaS.

EXPERIENCE

- Gammastack** Bangalore, India
Solution Engineer May 2025 – Present
 - Engineered backend services for a production iGaming platform spanning casino, sportsbook, and real-time multiplayer features across a **microservices** architecture with independently deployable services.
 - Built a server-side Responsible Gambling enforcement layer intercepting gameplay and deposit actions to apply configurable bet limits, loss limits, session time caps, and self-exclusion — ensuring regulatory compliance.
 - Implemented a **multi-level KYC** pipeline using **Veriff APIs**, automating identity and document verification with a structured admin approval and escalation workflow.
 - Integrated **Layer1** crypto protocol for multi-currency deposits and withdrawals, with automated exchange-rate synchronization via scheduled jobs — eliminating manual reconciliation.
 - Designed a bonus engine consolidating **5+ reward types** (joining, referral, deposit, cashback, wagering) into a single extensible workflow, powering automated VIP tier progression based on player activity.
 - Replaced ad-hoc scripts with a **Bull (Redis)** queue worker service, giving background jobs retry logic and failure visibility via Bull Board, with independent deployability from the main API.
 - Scaled **Socket.IO** real-time infrastructure across multiple **Node.js** instances using a **Redis** adapter, enabling horizontal scaling of live player features without sticky sessions or dropped connections.
 - Reduced API response times by **70%+** through **PostgreSQL** query tuning and advanced indexing strategies.
- Qodic Technosoft** Remote
Software Developer Sept 2024 – Feb 2025
 - Migrated a legacy **React** codebase from class-based components to functional components with hooks, reducing boilerplate and improving maintainability.
 - Built a modular, reusable payment UI component library using **Tailwind CSS** and lazy loading, enabling deployment across multiple client projects without duplication.
 - Improved frontend performance through **Lighthouse**-driven audits, addressing render-blocking resources, code splitting, and asset optimization.
- Nagarro** Gurugram, India
Associate Software Engineer → Software Engineer Feb 2022 – Aug 2024
 - Built and maintained scalable backend services using **Node.js/NestJS** (built on **Express**) following Domain-Driven Design, serving multiple enterprise clients with high reliability.
 - Designed RESTful APIs and relational database schemas using **Prisma ORM**, enforcing consistency, ACID compliance, and maintainability across a team of engineers.
 - Developed modular frontend components in **ReactJS** as part of a microfrontend architecture, enabling independent deployment and ownership of UI modules across teams.
 - Participated in code reviews and supported junior developers with best practices, contributing to improved code quality and faster onboarding across the team.
 - Authored API documentation using **Redocly** and wrote automated test suites with **Jest**, reducing regression incidents and improving third-party integration clarity.

SKILLS

- Backend:** Node.js, NestJS, Express, TypeScript, JavaScript, Python, Microservices, Socket.io, Apache Kafka
- Frontend:** ReactJS, Redux, Tailwind CSS, React Storybook, Microfrontend Architecture
- Databases:** PostgreSQL, MySQL, Redis, Sequelize, Prisma ORM, MongoDB, Kubernetes, SQL Query Optimization
- Infrastructure:** AWS (EC2, ECS, ECR, S3), Docker, Git, Postman, JIRA
- Integrations:** Layer1 (Crypto), Veriff (KYC), Agora (Real-time), OAuth 2.0, Web3 / MetaMask

EDUCATION

Acropolis Institute of Technology and Research

Bachelor of Technology in Information Technology

Indore, India

Aug 2018 – Aug 2022
